

Thunderbird Field Services

Thunderbird Field Services conducts a wide variety of oilfield services, committed to meet the needs of our clients through providing safe, efficient, and quality performance in all activities.

Our team has significant experience (20+ years) with oilfield services, including workover operations, completion operations, production operations, project management, as well as all construction, maintenance and testing capabilities. Our field crews are highly experienced, self-motivated, and safety conscious, as well as capable of identifying potential cost savings opportunities and technical solutions for process issues. We have multiple processes in place that are focused on our team's continuous improvement in safety, training, and customer satisfaction.

Thunderbird Field Services is dedicated to providing the highest possible level of performance in every operation, and guarantee our clients complete satisfaction. We provide personal accountability to all our clients, and strive to build long lasting relationships that benefit us all.

Our capabilities consist of the following services:

- Production system installation and Hook-ups (tank batteries), including repairs and maintenance
- Pipeline installations, repairs, and maintenance
- Water treatment facility construction
- Compressor station installations and maintenance
- Facility & plant maintenance
- Project Management and QA/QC services
- Lease road and well pad construction, pits, and timber clearing
- Roustabout services, spill clean-up, fencing
- Rig washing, pit cleaning, general labor
- Line locating and Hydravac services

We are members in good standing with ISNworld, Veriforce, Oildex, and PEC

Thunderbird Field Services

Thunderbird Field Services is a relatively new company in itself, established in 2016, but has the experience of a typically seasoned service company with the veteran leadership team that has been implemented. Key members have 20+ years in the Oil & Gas industry, ranging from Construction, Production, Maintenance, Completion, and Workover Operations. We have hand selected and trained our key supervisors to be highly focused on client satisfaction, safety performance, and operational efficiency. Our team has repetitively met our clients expectations in delivery of schedule, cost, and quality, while maintaining an excellent safety culture (NO LTA's)

Our team has conducted multiple pipeline construction and maintenance operations for Legacy Reserves, Energy Transfer, and ETX Energy. These projects range from new installations (up to 8" Steele), 4 mile lengths, poly fiber installations, anomaly digs, leak repairs, line locates, hydravac operations etc....

We are routinely conducting tank battery installations / hook-ups for EnXL, PRI Operating, CPX Energy, Hyperion Energy, Admiral Resources, & Contango Oil & Gas, etc.... The remainder of our crews are dedicated to maintenance activities for multiple operators.

We have a complete arsenal of equipment, and the strategic partnership agreements necessary, to meet the needs of our clients and their operational activities, including but not limited to the following:

- 1- Twelve fully rigged out crew trucks
- 2- Ten service & utility trucks
- 3- Two hydravac machines
- 4- Two Line Locate crews
- 5- Multiple gooseneck, utility and pipe trailers
- 6- Backhoes, Track hoes, Bulldozers, Skid Steers, etc....
- 7- Full compliment of skids, line-up, and stringing equipment
- 8- Pressure washers, poly pipe reelers, fusion machines, etc.

Our Team currently consist of approximately 50 employees with 4 to 5 key supervisors. Management staff consist of Operations Manager, HSE Manager, Accounting, and Sales. Thunderbird Field Services also has strategic alliances / partnerships with Engineering and Project Management Resources.
